

The Forum CONFER III allows you to conference customers, managers and team members and keep your business running smoothly. You need a partner who is as dependable as our technology.

The CONFER III is the most durable voice conference system on the market, with the most competitive price in the industry and the latest in DSP technology and design.

Modularity, interoperability, flawless sound clarity and long-term superior service meet in an affordable, easy-to-use, plug-and-play bridge:

- * Host your own conference calls and save hundreds or thousands of dollars per month over your current conference service.
- * Upgrade your existing or outgrown conference hardware.
- * Bring your conference call meetings in-house for enhanced security.
- * Implement a smooth transition to our more affordable conference call solutions.
- * Enhance your productivity and bottomline for management and shareholder payback.

Since 1991, thousands of major corporations, telecom/IT managers, and emergency response agencies choose and recommend Forum conference technology. Forum Communication's support and training programs keep your system at peak performance.

The CONFER III interfaces with virtually ANY PBX or Key System in today's evolving multi-vendor environments. Upgrades and feature enhancements are designed for instant and remote installation.

Remote Administrative options let you bundle the Confer III enhanced conference control, remote configuration and management functions. CONFerview software gives you real-time display and control via GUI Interface direct connect or Modem.
